## Alax.Info NTFS Links

Alax.Info NTFS Links, is an All-in-one NTFS link management application that lets you create, delete, move and copy soft and hard link from the context menu. Besides the new features we are also adding the option to paste copies as soft or hard links. Alax.Info NTFS Links has built-in support for creating soft and hard links on NTFS file system with ease. The present invention relates to an improved closing device for a sprayer nozzle having a lid which is movable from a closed position to an open position by means of a lever arrangement. In particular, the closing device disclosed in this application is designed to prevent premature opening of the sprayer nozzle prior to use of the container. This reduced premature opening is accomplished by the simultaneous movement of the lid and a collar or fastener which is integral with the lever arrangement. Various prior art mechanisms have been designed to prevent premature opening of a sprayer nozzle, particularly when the sprayer nozzle is applied to a liquid container. For example, the following United States Patents disclose various mechanisms to prevent premature opening of sprayer nozzles:

U.S. Pat. No. Inventor  
3,884,340 F. R. Brittingham 3,984,386 H. B. Nichols 4,112,835 R. D. Morris 4,249,744 P. S. Larson et al 4,256,095 H. Von Waldeyer-Hartz

It should be noted that the devices disclosed in the above identified patents are specifically designed to prevent premature opening of a sprayer nozzle prior to application to the container. In the present application, the closure device of the present invention is not designed to prevent premature opening of the sprayer nozzle prior to application to a container. Other prior art devices which may be related to the present invention include: U.S. Pat. Nos. 4,064,984; 4,242,729; 4,612,859; and 4,657,311. The present invention provides a sprayer nozzle having a lid which is movable from a closed position to an open position by means of a lever arrangement. The sprayer nozzle also includes a fastener mounted on a collar. The fastener and collar are movable from a first position to a second position in response to the simultaneous movement of the lid and the collar. In particular, the present
